

EM-1234 | Magnetic Mount

Description

The EM-1234 Magnetic Mount is designed to be a flexible mounting solution for our omni-directional antennas.

The mount can be used in conjunction with our rugged omni-directional antennas, EM-6841 and EM-6843, or our standard EM-6856.

The EM-1234 can be mounted on any metal wall or vehicle roof using three magnetic feet.

For flexibility, the EM-1234 can also be mounted onto any standard ¼-20 tripod stud.

EM-1234 requires the use of a right-angle adapter with all antennas.

Specifications

Diameter	11.1"
