

EM 1612 | Multi-Mount

Description

The EM-1612 Multi-Mount is designed to be an all-in-one mounting solution for our rugged omnidirectional antennas, EM-6841 and EM-6843 and whip antennas, EM-6500 and EM-6501.

The mount can be applied to a standard 1/4-20 tripod stud. The mount can also be mounted to any metal wall or vehicle roof using magnetic feet. Lastly, the mount can clamp onto a typical 2-3" pole.

When using the magnetic feet or on a pole, the mount itself can pivot 90 degrees to allow for vertical or horizontal mounting of the antennas.

Specifications

Length:	16.5"
Width:	5.5" - 6.75"
Height:	3.3" - 6"
Antenna Options:	Omni-Directional: EM-6841, 6843
	Whip Antenna: EM-6500, 6501

Mounting Options:	Mounts to 1/4-20 tripod
	Magnets supplied for mounting to metal surfaces
	Clamps to 2-3" pole
Color Options:	<ul style="list-style-type: none"> • Black (default) • Custom colors available upon request
