

EM-6944 Antenna, Log Periodic

Description

The EM-6944 offers an exceptional combination of frequency coverage from 200 MHz – 3 GHz and high power handling capability without compromising the consistent performance versus frequency that makes the log periodic antenna so desirable for test applications.

The wide band technology employed in the EM-6944 allows the convenience of a single antenna for tests that would require two or more antennas in the past

Specifications

Electrical

Frequency Range:	200 MHz - 3 GHz
Impedance:	50 Ohms, nominal
Average VSWR:	2.0:1
Maximum Continuous Power:	1000 W
Connector:	Type N

Mechanical

Length:	80 cm (31")
Width:	75 cm (30")
Height:	12.7 cm (5.0") 55 cm (22") with antenna mount
Weight:	1.9 kg (5 lb.)

Specifications subject to change without notice, unless otherwise specified. Product is manufactured in Johnstown, NY, U.S.A.
